London SE15 | mobile: 07434565222 | email: kiattisak.dujda@gmail.com

Key Technology Skills

Programming: **JavaScript, HTML, CSS, Python, PHP, Java**

Databases: **MySQL, PostgreSQL, MongoDB**

Web Framework/Platform: **NodeJS, React, Express, Bootstraps, Git, Flask, Django**

Others: **Git, Azure, AWS**

Personal and Student Projects Highlights

1. UK Nutrition Fact Calculator, Food Label Builder

- A web application to calculate nutrition value from the UK food source.
- Extracted and Converted data from the UK government using Python to MongoDB.
- The analysed value and label are compatible with UK Food Standard.

Achieved: Python, JavaScript, Node.js, Express.js, MongoDB, AJAX, jQuery

<https://nutrition-fact-calc.herokuapp.com/>

2. Game - Flappy Bird Clone

- A simple fun to play the famous flappy bird clone.

Achieved: JavaScript, CSS, HTML, P5.js

<https://flappy-bird-01.netlify.com/>

3. HTML Table Generator

- A functional web application to generate HTML for a custom and complex table without coding (similar to excel but more convenient).

Achieved: JavaScript, jQuery, HTML, CSS

<https://excel-table-generator.netlify.com/>

4. String Quartet Band Matching

- An implementation of a custom algorithm for a fictional string quartet club.
- It generates a band from members who matches score and quality in performance.

Achieved: PHP, HTML, CSS, JavaScript, MySQL

http://doc.gold.ac.uk/~ma001kd/software_project/admin.html

5. Twitter Sentiment Analysis

- A web application to demonstrate the potential of text classification implementing Naive Bayes Classifier from NLTK and Twitter API

Achieved: Python, NLTK, Matplotlib, Tweepy, Twitter API, SQLite, Flask

Education

September 2015 BSc Computer Science, Goldsmiths, University of London

Work History

2017 – 2020 **Lemon Grass, Thai Restaurant as a line chef, Chichester, West Sussex**
Prepping, cooking, presenting in the starter section and managing food ordering during business hours, ensured high standards of food hygiene.
